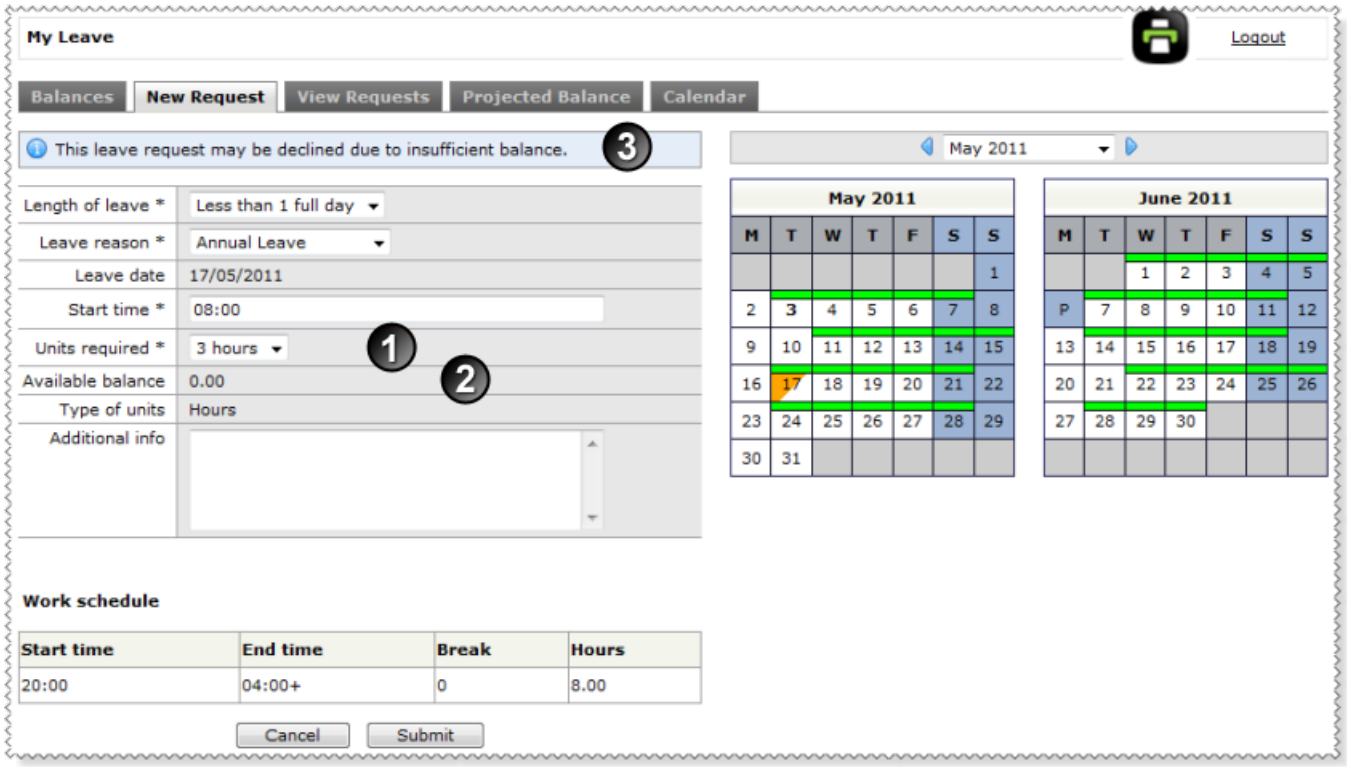
Leave in days

ESS handles partial leave differently for employees with the following settings:

- *Timesheet type* = "2. Timebands by timesheet"
- Leave table has *Entitlement unit* = "Days".

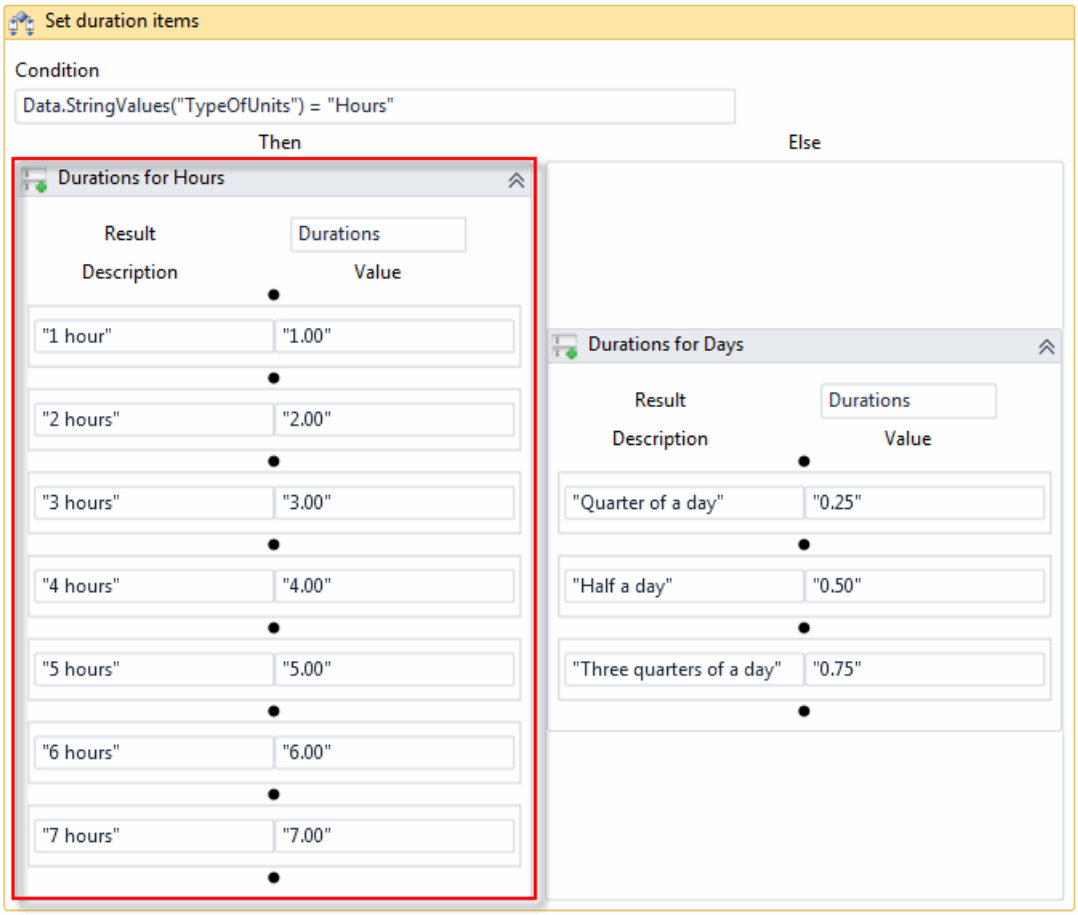
When an employee with these settings applies for "Less than 1 full day" leave in ESS, ESS needs to know how many hours leave the employee requires and how many hours a day the employee normally works in order to calculate what portion of their day they are taking leave.

Even though the employee's leave entitlement is in days, they must apply for leave in hours.



1	The employee must apply for leave in hours.
2	*Available balance* always displays 0.00 because ESS does not have enough information to calculate this value accurately.
3	ESS cannot calculate the employee's *Available balance* accurately for the compliance check; the request is always treated as though the employee does not have enough entitlement to cover the request. In this example, Compliance = Warning, so the warning message is displayed. If Compliance = Enforce, the employee will not be able to submit their request so you need to apply a different compliance for these employees.

When the employee selects the number of hours that they are requesting in the *Units required* drop-down, ESS sources the value from the *Durations for Hours* activity in the *Enter LeaveRequest* form flow.



The number of hours selected is then converted back to days so balances can be displayed in days.

ESS uses the following calculation to convert the hours requested back to days:

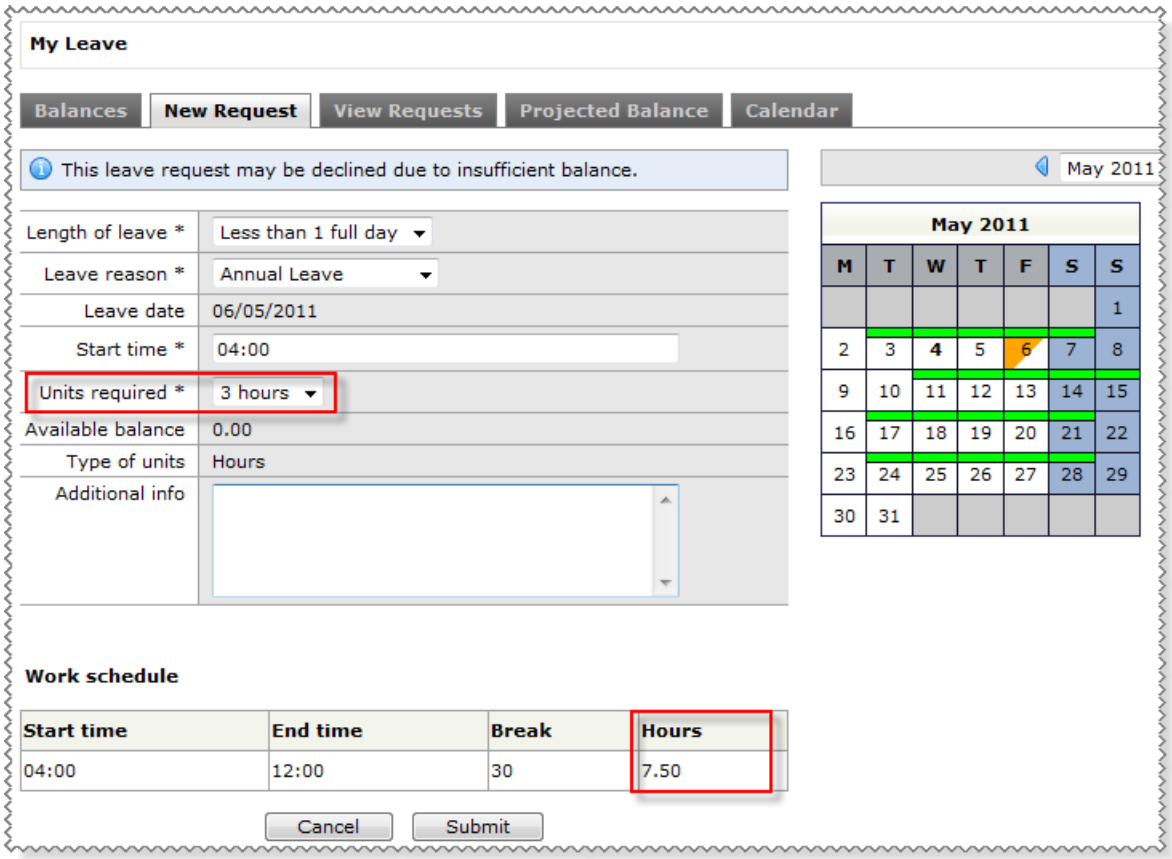
Hours requested / Hours expected to work on day.

- Hours requested = the number of hours selected in the *Units required* drop-down.
- Hours expected to work on day = sourced from the employee's profiled hours or roster.

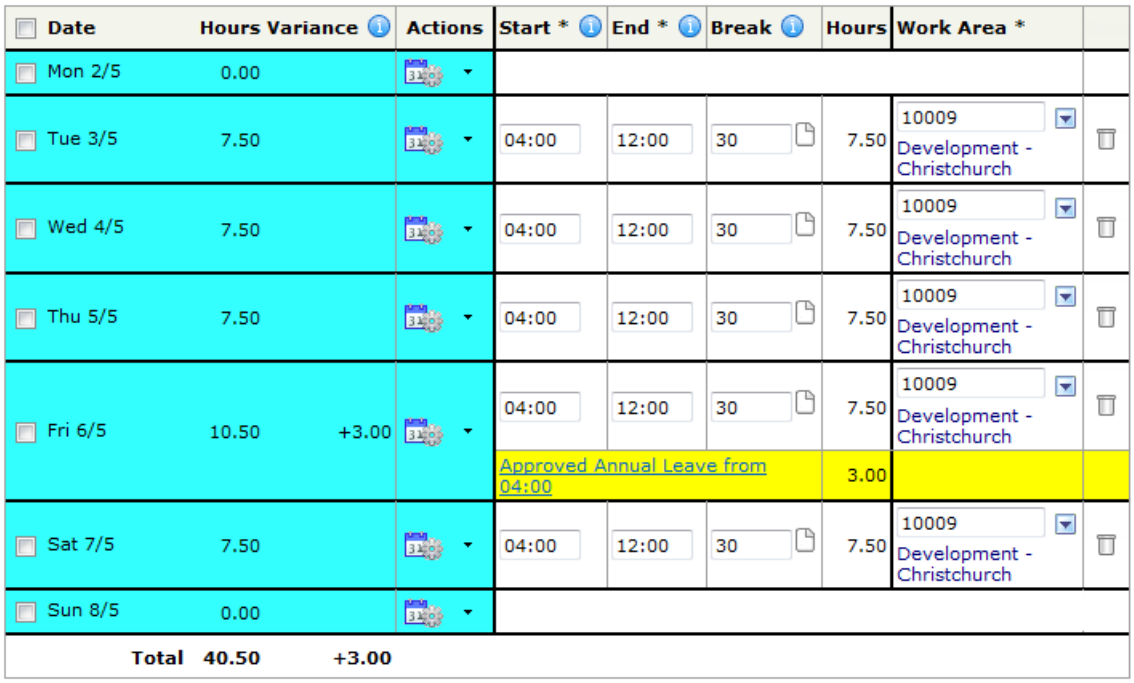
Example

The following example shows a leave request for a rostered employee (with leave entitlement in days).

- The employee is rostered to work 7.5 hours a day and they have requested 3 hours leave.



- The approved leave request is displayed on their timesheet.

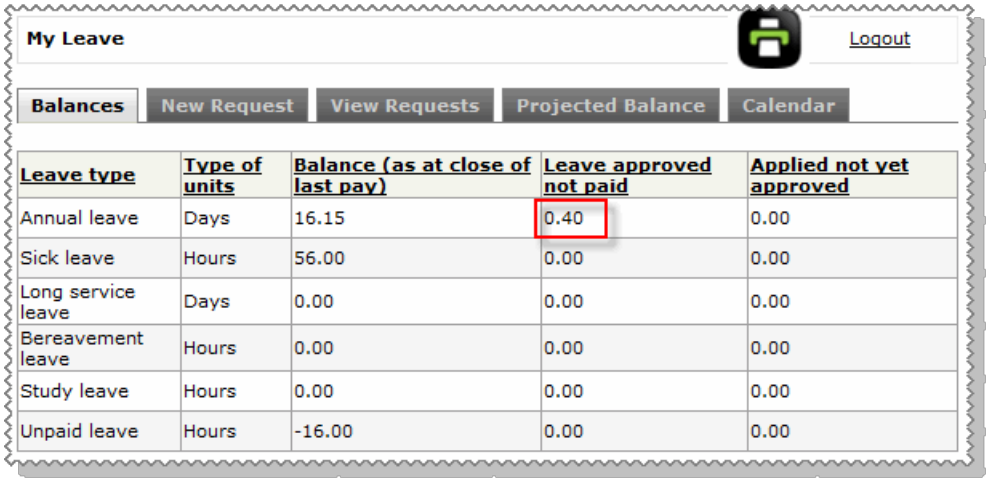


Date	Hours Variance		Actions	Start *	End *	Break	Hours	Work Area *
Mon 2/5	0.00							
Tue 3/5	7.50			04:00	12:00	30	7.50	10009 Development - Christchurch
Wed 4/5	7.50			04:00	12:00	30	7.50	10009 Development - Christchurch
Thu 5/5	7.50			04:00	12:00	30	7.50	10009 Development - Christchurch
Fri 6/5	10.50	+3.00		04:00	12:00	30	7.50	10009 Development - Christchurch
				Approved Annual Leave from 04:00			3.00	
Sat 7/5	7.50			04:00	12:00	30	7.50	10009 Development - Christchurch
Sun 8/5	0.00							
Total	40.50	+3.00						

- The leave request is exported as a separate timeband and displays the leave reason selected.

A	B	C	D	E	F	G
1003	20110502	0	0		0	
1003	20110503	240	720		30	
1003	20110504	240	720		30	
1003	20110505	240	720		30	
1003	20110506	420	720		30	
1003	20110506	240	420	LANNUAL	0	
1003	20110507	240	720		30	
1003	20110508	0	0		0	

- ESS converts the hours requested back to days so the employee's balance is displayed correctly:
  Hours requested (3) / Hours expected to work on day (7.5) = 0.40



My Leave

Logout

Balances | New Request | View Requests | Projected Balance | Calendar

Leave type	Type of units	Balance (as at close of last pay)	Leave approved not paid	Applied not yet approved
Annual leave	Days	16.15	0.40	0.00
Sick leave	Hours	56.00	0.00	0.00
Long service leave	Days	0.00	0.00	0.00
Bereavement leave	Hours	0.00	0.00	0.00
Study leave	Hours	0.00	0.00	0.00
Unpaid leave	Hours	-16.00	0.00	0.00

Keyed employees

Keyed employees who have their leave entitlement in days also need to apply for full-day leave in hours.

However, ESS cannot convert the hours back to days so compliance checking is disabled and leave balances are not displayed for leave stored in days.
