Calendar

The *Calendar* tab displays similar information to the Team Calendar. However, the information displayed is only for the employee that you select from the *Employee* combo list.

Note: The *Calendar* tab does not use Layouts.

1	Select the required employee in the combo list.
2	The employee's leave requests are highlighted on the calendar.
3	The legend shows: • the colour that is assigned to each leave reason • the symbols that show the state of the request.

You can view the following information for the employee on the *Calendar* tab.

- All leave the employee took during the selected year.

  To view results for a different year, use the navigation section at the top-left of the calendar.

  Calendar Navigation
  Click the backwards and forwards arrows to move the calendar backwards or forwards the number of months currently displayed.
  Click the calendar button to select the month that the calendar will start from.

  
  For example, if you are viewing a 12 month layout and you select *March 2010*, then the calendar displays March 2010 to February 2011.

  This view also helps you analyze employee leave. For example, you can easily see if an employee often takes sick leave on Mondays and Fridays.

- All leave the employee has requested during the selected year, including leave that has or has not been approved.

When you click a day on the Calendar that is highlighted as a leave request, a popup appears. The popup displays more information

about the request and links that you can use to manage the request.

The links that are available depend on the state of the leave request (see Popups).
